

## **Karina Beumer - You iou uio**

The performance consists of a telephone conversation in which the volunteer will be the person called - YOU. Coincidental passers-by will only hear one side of the conversation. The words of the other person in the call, PHILIP, are only meant for the volunteer and should not be made public.

The volunteer walks and talks with the phone at his/her ear during the performance. The script is not necessarily used very strictly. The volunteer is free to choose to use either a Dutch or an English version. He/she may learn the text by heart or can read the script from print.

Time of preference: between 10:00 a.m. and 06:00 p.m.

## **Emmy Vollaard**

It felt like I really had a conversation with an old friend although I never heard his voice before. I experienced a kind of nervous feeling in my chest and stomach. The part about the skydiver's body language resembling mine I found to be really intimate and bewildering. When I hung up I realised I wasn't finished talking.
